Consolidated Carpet: At Your Service

A National Leader with a Tradition of Service

Consolidated Carpet is a service-oriented, commercial floor covering contractor. As a third generation, family-owned business, we are dedicated to providing unparalleled expertise, superior client service, safety, sustainability and elegant design. As one of the nation's largest and most recognized full-service floor covering contractors, we serve our clients from planning and specification through installation and maintenance. Our prestigious clients include Fortune 500 corporations, professional service firms, luxury hotel properties, institutional properties, real estate owners and general contractors. Get to know us: a team of professionals, committed to delivering excellence in every project we manage. We are...At Your Service.

Sustainability

For the team at Consolidated Carpet, a commitment to sustainability is a critical part of our work. We have diverted millions of pounds of used flooring materials from landfills – and we will continue our commitment to protect and preserve the environment with expanded sustainability goals. To achieve this, we have commissioned a sustainability consultant to develop the best program in the industry by reviewing both our professional practices and our daily business operations.

Since the 1980s, Consolidated Carpet's goal of diverting material from landfills and supporting environmentally conscious practices of reuse has been recognized as one of the leading carpet reclamation programs in the country. As one of the nation's largest full-service floor covering contractors, Consolidated Carpet leads the industry in our environmentally conscious programs and we are committed to providing innovative sustainable and reclamation services for every project.

Installation

Consolidated Carpet strives to be environmentally aware installers. When providing estimates for our projects, the team at Consolidated Carpet provides precise material estimates which eliminate excess scrap waste and transportation costs. The scraps we do have are brought back to the warehouse and diverted from the landfill.

We also install using low-VOC adhesives and self-leveling materials whenever possible. Because our installers are trained in these practices, project teams pursuing LEED certification can be confident we will abide by LEED VOC requirements, thus contributing to their certification goals. We are committed to not only providing our clients the most resource-efficient flooring installations possible, but also utilizing environmentally sustainable measures to the greatest extent we can.

ConServe Reclamation Programs

Consolidated Carpet is proud to be at the forefront of carpet reclamation, the recycling of unused carpet. We have been collecting used carpet for reclamation studies since the late 1980s and are considered a national leader in our industry.

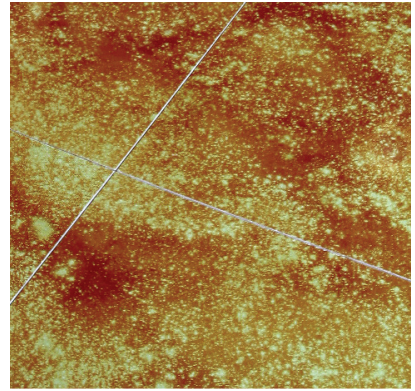

Today, Consolidated Carpet has partnered with the industry's leading manufacturers to assist in the collection process of used carpet to supply feed stock for some of the most innovative recycling programs in the flooring business.

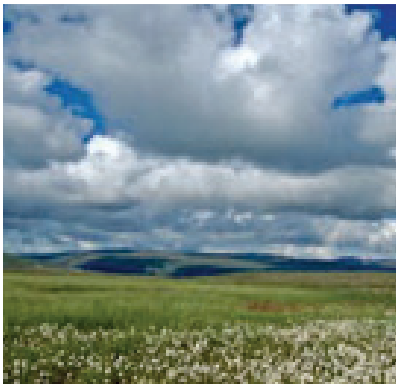

Green Engineering

Consolidated Carpet encourages the use of sustainable materials whenever possible. We believe there is almost always a greener option that performs as well or better than conventional alternatives. We are committed to offering clients information on environmental choices for each unique project through our Green Engineering Services – a new offering which will help clients identify quality sustainable products and installation practices appropriate for their project. Upon our client's request, Consolidated Carpet is able to provide green project estimates alongside our traditional estimates to support informed decision making.

Contact Us Today

Consolidated Carpet is dedicated to providing innovative sustainability and reclamation services on every project we can. When contemplating renovation or demolition, contact Consolidated Carpet to learn more about our reclamation solutions for your current floor coverings, as well as ceiling tiles and office furniture.
