Consolidated Carpet: At Your Service

A National Leader with a Tradition of Service

Consolidated Carpet is a service oriented, commercial floor covering contractor. As a third generation, family-owned business, we are dedicated to providing unparalleled expertise, superior client service, safety, sustainability and high quality. As one of the nation's largest and most recognized full-service floor covering contractors, we serve our clients from planning and specification through installation and maintenance. Our prestigious clients include Fortune 500 corporations, professional service firms, luxury hotel properties, institutional properties, real estate owners and general contractors. Get to know us: a team of professionals, committed to delivering excellence in every project we manage. We are...At Your Service.

The Furniture Lift System: New Carpet with No Interruption

Consolidated Carpet is a licensed Renovisions® provider, bringing a patented furniture lift system to clients with occupied office space. This state-of-the-art system provides the unique technology to create an efficient and economical alternative to dismantling and moving office furniture while replacing floor covering. We carefully and expertly lift your existing furniture and replace the flooring beneath. No moving, packing or disconnecting existing data systems or electrical wires that reside within the furniture system. Most importantly, Renovisions® allows you to preserve valuable productivity and adds up to a 40% cost savings compared with traditional replacement techniques.

Utilizing state-of-the-art lift technology, Consolidated Carpet's certified installers expertly raise your furniture system and replace your old flooring with new.

The Pioneer in Lift Technology

Today's work environment must be designed for flexibility and mobility, minimizing downtime and overall cost. Because of this, modular interior solutions and products are popular amongst employees and facility managers. Modular flooring products allow for selective replacement, replacing only what you must to reduce the impact on the environment and your budget.

Consolidated Carpet can efficiently replace your floor covering without disconnecting wires and cables within furniture systems or total breakdown of furniture systems. Renovisions® technology pioneered the science of the furniture lift process. Renovisions® equipment and technology include a hand-controlled friction jacking system, custom fittings, patented freestanding lifting devices and other move tools that insure proper handling of all major furniture systems. In addition, our technology allows us to work safely with voltage, voice and data wires, which saves our clients time, labor and materials.

Imagine: Arrive Tomorrow to Find New Carpet

Conducted at night or during your non-business hours, the Renovisions® lift process applies patented lifting equipment, specialty tools and extensively trained technicians to lift modular workstations and other office fixtures for both old carpet removal and new carpet installation. The process does not already affect furniture warranties and allows for zero disturbances to your workflow. Consolidated Carpet service technicians analyze your existing space and develop a customized program that works flawlessly with your furniture systems and other office fixtures. Technicians will notify your associates when the furniture lift process will begin and provide nightly reports for your facility manager.
